[How To- Fix "stop 0X0000024" Error In Microsoft Windows 2000](#)

Make sure your Hard drives have been formatted with either **FAT32** or preferably **NTFS**.

If your drives should happen to be formatted with **FAT16**, then the long filenames used by windows can be damaged if **Scandisk** or another MS-DOS hard disk tool used to verify the integrity the of your hard drives from an MS-DOS prompt.

Always use **Windows 2000 Chkdsk** on Windows 2000 and **Windows XP Chkdsk** on Windows XP.

Make sure you are up to date with service packs and any other Microsoft update. These can and will prevent any future misfortune that may come your systems way.

SIMPLY - Keep Your System Up To Date

To check if your system is up to date then do this.

Click **START, RUN** and type **Winver** then press **Enter** or click **OK**.

You will see this or something like this. This will tell you if you have the latest service pack installed.

Occasionally, remedies to specific problems are developed after the release of a **Service Pack**. These remedies are called hot fixes. Microsoft does not recommend that you install a post-Service Pack hot fix unless the specific problem it addresses has been encountered.
